Analysis Of Antacid Experiment In this experiment, the reagents combined are an acid, HCl (aq) and a base, NaOH (aq) where the acid is the analyte and the base is the titrant. The reaction between the two is as follows: $\text{HCl (aq)} + \text{NaOH (aq)} \rightarrow \text{H}_2\text{O (l)} + \text{Cl}^- \text{(aq)} + \text{Na}^+ \text{(aq)}$ In this case, Sodium and Chloride act as spectator ions and form into salts in a neutralization reaction. Acid-Base Titrations: Standardization of NaOH and Antacid In this experiment, several brands of antacids will be analyzed to determine the number of moles of acid neutralized per tablet and the cost analysis of each tablet. The analytical procedure used

is known as back titration. In this procedure, a known amount of HCl, which is in excess, will be reacted with a weighed portion of a ground antacid

tablet. Chemistry 104: Analysis of Antacid

Tablet Antacids neutralize the excess acid and "relieve" but not eliminate the condition. The reaction that takes place is an acid/base reaction. A little bit of NaOH might be equally effective, but it is extremely rough on the rest of the digestive system, so antacids need to be formulated to reduce acidity while avoiding physiological side-effects. Analysis of an Antacid PART II: ANALYSIS OF STOMACH ANTACID TABLETS

OBJECTIVE: The object of this laboratory activity is to become familiar with making solutions and to titrate an

acid with a base. One solution will be prepared from a solid and one solution will be prepared by dilution of a concentrated solution. MATERIALS NEEDED: stomach antacid tablets Analysis of stomach antacids - chymist.com ANALYSIS OF STOMACH ANTACID TABLETS Teacher Notes This experiment is designed for students working singly or in groups of two. The overall purpose of this experiment is to determine the effectiveness of two different brands of stomach antacid tablets. The procedure, however, involves a number different processes. ... Analysis of stomach antacids teacher notes Experiment 9 Analysis of an Antacid using the ideal gas law. Calculations: 1) Find moles of CO_2 . 2) Find moles of NaHCO_3 . 3) Find mass

of NaHCO_3 . 4) Find mass % of NaHCO_3 . 5) Find average mass % NaHCO_3 in Alka-Seltzer. Show transcribed image text. Solved: Experiment 9 Analysis Of An Antacid Using The Idea ... Antacid (weak base) + HCl (stomach acid) \rightarrow salts + H_2O + CO_2 The hydrochloric acid solution used in this experiment (0.1 M) approximates the acid conditions of the human stomach, which is typically 0.4 to 0.5% HCl by mass (pH \sim 1). Antacids help people who have or get heartburn. Antacid for neutralizing stomach acid - Chemistry Project ... To do the experiment, an antacid tablet will be dissolved in a known excess amount of acid. The resulting solution will be acidic because the tablet did not provide enough moles of base to

completely neutralize the acid. The solution will be titrated with base of known concentration to determine the amount of acid not neutralized by the tablet. Lab 4 - Determination of the Amount of Acid Neutralized by ... The aim of this laboratory experiment is to quantify the amount of HCl neutralized by two different antacids. The active pharmaceutical ingredients (APIs) in antacids work by either raising the pH and/or by buffering the solution so it is resistant to further pH change. This lab will deal with antacids that work through Figure 1. Antacid Comparison Laboratory Instructor's Version If the HCl has a lower concentration than what it should be then there is less acid. If there is less acid present then there will be

fewer moles of base present as well. 3. Antacids neutralize the acid content, so if the CO₂ is not removed gentle boiling then the amount of antacid in the sample will be too low. 4. Experiment 17 Lab report chem 112 - CHEM 110 - StuDocu Experiment 5: Titration of an Antacid One of the most common gastrointestinal complaints is to as acid human stomach contains In fact, the average is than normal, M Ha required for the digestion of food. However, when the There which claim to relieve this condition. Most of them contain weak base in tablet form, combined with binders and flavoring agents. Solved: "Experiment 5: Titration Of An Antacid" A) Find Mo ... The analysis of antacid tablets was highlighted in this experiment. The

efficiency of antacid tablets was determined and compared when the number of grams of HCl can be neutralized by 1 gram of the tablet was found. First, the two antacid tablets (Kremil-S) were crushed and weighed to the nearest 0.01 g which was 0.5003 g and 0.5014g. Acid-Base Titrations: Analysis of Antacid Tablets | Essay ... Colorful demonstration of the fate of "excess stomach acid." This video is part of the Flinn Scientific Best Practices for Teaching Chemistry Video Series, a... Neutralization Reaction of an Antacid - YouTube To analyze the given samples of commercial antacids by determining the amount of hydrochloric acid they can neutralize.5VINAY KUMAR XII A. 6. INTRODUCTION Digestion in the stomach results from

the action of gastric fluid, which includes secretions of digestive enzymes, mucous, and hydrochloric acid. Chemistry investigatory project on antacids ANALYSIS OF STOMACH ANTACID TABLETS. ANALYSIS OF STOMACH ANTACID TABLETS. Written by L. Phillip Silverman and Rachel Popelka, University of Missouri - Columbia, Columbia, MO 65210. PURPOSE. In this experiment you will measure the amount of stomach acid consumed (or neutralized) by various antacid tablets (Maalox, Tums, Roloids: no Pepcid or Tagamet!). ANALYSIS OF STOMACH ANTACID TABLETS Experiment: Stoichiometric Analysis of an Antacid. 1. Introduction. In this lab, you will use the concept of stoichiometry to solve two sequential

problems. First, you will try to determine the products of a certain reaction (below), choosing between three possibilities. Experiment: Stoichiometric Analysis of an Antacid Antacid analysis Accurately transfer 0.35 g of a pulverized commercial antacid tablet to a 250 mL Erlenmeyer flask, recording the exact amount used. Add about 20 mL of distilled water to the flask and then pipet 5.00 mL of standardized HCl to the flask swirl the mixture to dissolve the antacid. Volumetric Analysis: Analysis of antacid tablets Analysis ... • The information gained from this experiment will help people know which antacid they should look for in the stores. It will also let them know which antacid will give them the most comfort. This could also save

consumers money and provide better health.
